Dear ladies and gentlemen,

I am very interested in the volunteer position currently available on the EHRA Board of Directors as a representative of the South East Europe region.

Through the regular information process, EHRA informed me about the process and it immediately attracted me because for some time now I want to share my experiences from my 20-year career in Harm reduction with people who think similarly and have similar views and attitudes.

I have worked and am working as a volunteer in the past and currently, where my responsibilities are related to management and decision making, as well as the development of strategic documents and various policies.

The variety of skills needed for these jobs, along with my natural leadership qualities, have allowed me to expand and add my skills while enjoying the challenges in my own hands.

It is a special challenge to work in a multinational team and improve their skills on a daily basis, to celebrate diversity, and above all to work on a very serious job aimed at protecting the human rights of all marginalized populations.

I see my role on the Board of Directors as a great opportunity to share experiences, strengthen EHRA in all its forms, because the experience I have can help both individually and in team work. I would focus my efforts on further promoting democracy, transparency and increasing EHRA. I would also advocate for greater participation and voice of service users, as well as promotion and support for the new young leaders who should succeed us.

In addition, I would like to assist in the development and promotion of service quality, and advocacy activities in changing drug policies that must be based on human rights and public health policies based on records and facts.

Volunteering has always been a part of my life in one form or another, and EHRA is an organization where I would like to be a part of it and give my full contribution to its strengthening.

Please follow my resume for your consideration, and I ask you if you have any questions so that you can feel free to contact me.

Best regards and I expect news from you,

Denis Dedajić
